

WHAT IS PLUTO TOKEN?

Pluto Token (PLT) is utilizing Defi and the blockchain technology of distributed ledger and smart contracts to bring all the participants in the supply chain including the farmers, transporters, distributors, processed food brands, wholesalers, retail stores and other food outlets on a single hybrid platform. It is a secure and incorruptible infrastructure, as all actions are registered in a Blockchain.

PLT protocol will combine some of the best features of a decentralized finance market protocol, maximizing its own unique features, enabling users to enjoy the promise of a decentralized finance marketplace. It is Global Farmers Marketplace where food supply chain participants can meet and advertise their products and services.

OBJECTIVE

- Connect millions of rural smallholder farmers with new buyers of their produce through an app adapted to their needs.
- Solve the problem of food scarcity
- Focus on quality and healthy food
- Build an engaging community of food supply chain
- Give food supply chain partners the opportunity to advertise their services and products

VISION

Pluto Token is a community governed DeFi which will be a virtual market for all food chain supply participants. Pluto Token represents a paradigm shift in the very idea of agriculture and economic organizations, offering complete transparency, total token holder control, unprecedented flexibility, and Traceability. The platform will be secure, user friendly, simple, transparent and be self governing organization.

WHAT ARE THE USES OF PLUTO TOKEN?

- Pluto Token will be a virtual market for all food chain supply participants
